

Reduce administration time & effort by up to 30% with our automated workflows

Add unlimited users from across the project team

Enterprise level licences tailored to each individual client

Fully supported onboarding & environment set up

Access to locally based software support team and our CertCentral® University online learning hub

Digitalising checksheets

Project Risk Registers

Track, manage & mitigate risks in a digital environment

Digital thread of information

Robust workflows to track responsibility and capture evidence in a searchable, logical and transparent manner

Dashboards

Visually track progress, tasks and KPI's in real time

Design Review Process

A sophisticated technical submissions & design management tool

Common Data Environment (CDE)

With integrated 3D model viewer

Mobile Site Inspection / Snagging Tool

Raise & manage issues, snags and observations quickly and easily. Monitor progress, including photo evidence of close-out.

ELIMINATES THE REQUIREMENT FOR MULTIPLE SYSTEMS

Project Management

- My Tasks**
Centralised task manager, collating tasks from all projects for a user into one area
- Meetings**
Generate better engagement with individual accountable meeting actions
- Queries / RFI's**
Ensure all key project decisions are available at the click of a button

- Teams**
Pick up and transfer project tasks between members of the same team
- Project Risk Register**
Easily track and review all key project risks

Quality Management

- Inspection Plan Timeline**
High-level overview of all scheduled project inspections
- Inspection Plan Overview**
Detailed overview of all scheduled project inspections
- Issues Log**
Automatically populated log of all issues raised on site via mobile app
- Benchmarks Log**
Capture first of kind construction with detailed review process
- Photo Evidence (Site)**
Capture and store high resolution photos of good workmanship and good practice on site
- Connect App Drawings**
Manage all drawings required for site inspections, ensuring only relevant drawings are sent to the apps
- Checklist Manager**
Digitalise checklists for live data collection directly from the site or office, eliminating the need for paper forms
- Off-line Accessibility**
Draft issues and observations can be raised in the app without an internet connection, and can be synced to the system when a connection is re-established

Document Management

- Critical Documents**
Track and review all critical project documentation such as commencement and completion notices
- Project Documentation Log**
File storage for items such as surveys
- Notification Manager**
Manage all notifications for the various areas within CertCentral®

Design Management

- File Manager (CDE)**
Files are easily and instantly searchable and filterable with file naming compliant to the project BIM Execution Plan (BEP)
- Integrated 3D Model Viewer**
Fully integrated model viewer, with no need for additional software or licences
- Design Deliverables**
Bespoke design review area that also acts as a formal gateway to the Common Data Environment (CDE)

- Design Responsibilities Matrix**
Appoint work package owners for automation of issues and queries
- Planning Conditions**
Track and review all planning documentation as it enters the system

Health & Safety

- Healthy & Safety Issue Log**
Specific log and tracker for all H&S issues on site. Also includes COVID-19 issues.
